I took delivery of my copy of the new Damanek album "Making Shore" today and I have to report that it is a great release.

[Guy Manning](#) is always a brilliant story teller but he has excelled himself this time with a collection of outstanding songs.

The music is also first class but special mention must be given to [Marek Arnold](#) whose reeds work is astonishing throughout the whole album.

So, to sum up.....just get your hands on a copy. You will NOT be disappointed.

Thank you to everyone involved in getting this terrific release out here.
